Beginner Prompt Pack

✓

Whether you're brand new or running a real business, this pack meets you where you are. Run the orientation prompt first to find your tier, then run the prompts that match where you actually are. Every prompt below ends in a tangible artifact you can post, ship, or act on today.

NOTE: Everything in the Classroom is designed around Claude Code. Prompts we give you should be run in Claude Code. Say goodbye to Chat and Cowork! Claude Code can do EVERYTHING the other two can do, but so much more. 😎

Where am I in this?

First time in Claude Code? It needs a folder open before it takes a prompt. Create a new empty folder (name it anything, like `my-business`), open it in Claude Code, then

Claude Code Club

15

(Optional) Inside the Terminal: A ...

(Optional) The Few Terminal Co...

project. You can always create additional folders for new projects. Think of folders in Claude like any other organization folder on your computer.

You don't have to use EVERYTHING! Read through the prompts, choose what feels right for you, skip the rest, then move on!

Run this first.

1. Find your stage

Be honest with me about where I actually am. Ask me what I've already built, what's working, what's not, what I'm avoiding, and how much my work made me last month. Then tell me which tier I'm in — beginner (still figuring out who I serve and what I sell), mid-stage (shipping but stuck on growth or pricing), or advanced (running systems and hungry for leverage). End with which prompt below I should run next. Do NOT tell me to interview people, survey users, do market research, or come back when I'm 'ready' — pick the prompt I should run today from what I tell you.

Beginner — figure out who you serve and what you sell

2. Find your Ideal Client

Help me find my Ideal Client. Ask me one question at a time — about who I've helped before, who I light up around, who I keep saying no to — and pull out one specific person I should be building for. Give me a name, a job, a stage of life, and the exact problem they wake up worrying about. Don't tell me to interview anyone, survey anyone, or do market research — give me the answer from what I tell you so I can start building this week.

3. Craft your one-sentence offer

Help me write my one-sentence offer: what I do, who I do it for, and the outcome they get. Ask me one question at a time until it's specific enough that someone could repeat it back to a friend without forgetting any part of it. Don't tell me to interview anyone, survey anyone, or do market research — give me the answer from what I tell you so I can start building this week.

2/4

Claude Code Club

15

I have a hundred ideas pulling at me. Help me pick the ONE thing to focus on this week — based on what would actually move my life forward right now. Ask me about my energy, my money runway, what's already half-built, and what I'd regret not doing. Give me one focus and the smallest first move. Don't tell me to interview anyone, survey anyone, or do market research — give me the answer from what I tell you so I can start building this week.

Mid — already shipping; level it up

5. Productize what you do manually

Help me find the one repeatable thing I keep doing for clients (or for myself) and turn it into a product I can sell over and over without re-explaining myself. Ask me about my last 5 jobs, where I get the same questions, what people pay me twice for. Give me the productized version, the price, and how to launch it this month.

6. Charge more without flinching

Help me see if I'm underpriced. Ask me about what my best clients actually get, what they say to me, what they're already paying for worse versions, and what I'd charge if I had a 6-month waitlist. Give me a new number and the exact line I'd use when someone pushes back.

7. Build a content engine that compounds

Help me design a content engine I can run in 2 hours a week that compounds over a year. Ask me about my voice, my real story, the things I keep saying out loud to friends, and where I already show up. Don't give me 100 ideas. Give me the system — what I post, where, how often, and how each piece feeds the next.

Advanced — operator level; leverage and systems

8. Build a system that runs without you

Help me identify the ONE part of my work that's eating my time and could be a system, a hire, or an agent. Ask me about my week, my calendar, what I keep

9. Find your next leverage move

Help me see my next real leverage move — the one bet that compounds for years instead of weeks. Ask me about my audience, my IP, my product, my team, my code. Don't let me confuse activity with leverage. Give me one bet, why it's the highest leverage right now, and what I'd give up to make room for it.

10. Design your first 10x offer

Help me design a higher-ticket offer that's 10x my current price. Ask me about who's actually willing to pay 10x, what outcome would make that worth it for them, and how I'd deliver it without burning out. Give me the offer, the price, and the 5 specific buyers I should talk to about it this week.
