Where This Leads

Read this before anything else. This first stage is about *why* you're here, not *what to install* — because the install only matters once you can picture the destination. Every other lesson on this page is a tool; this one is the map.

By the end of the course you'll have **shipped real things**: a live site, a converting page, automated agents, and a build someone would pay for. Freelance/agency builds · automating your own business · content about what you build · a role where "ships with AI" is

 Where This Leads - STAGE 1 - START HERE · Claude Code Club

- **Saved Skills + an MCP pack** so Claude reaches real tools, not just answers
- **One agent on a schedule** doing a chore you'll never personally do again
- A **paid build** you delivered for a real human — or your own business automated end to end
- The **director's instinct** — describe, watch, react, ship — for the rest of your building life

That picture is the whole reason the next 9 stages are worth doing. Hold it. Everything below builds toward it.
