Two Doors: The App vs The Terminal

You'll walk away with: the two ways to run Claude Code, and which door to start with.

Claude Code comes through two doors, with the same Claude behind both. Neither is wrong. They just suit different people.

The terminal. The classic text screen, and how Claude Code began. It's fast, keyboard-driven, and plenty of experienced builders run everything from here. It looks bare at first, and

The desktop app. A normal window. You type what you want, you watch it work, you see your files and a live preview. Same engine as the terminal, wrapped in a familiar interface.

The rule for this whole course: **start with the app**. Not because it's better, but because it's the easier door to walk through on day one. The terminal is fully supported and always there,

and if you'd rather make it your main driver, that's a completely valid way to build. Both get you to the exact same place.

If you want to go that route, there are two optional lessons at the end of this stage that make the terminal feel easy. No rush, and no pressure.

Next: let's install it.
